**RIGGTEK**

*The Evolution in Dissolution Testing*

actual information 06/2016

# Analytica 2016

Thank you for your numerous visits!

# Analytica 2016

During and after the Analytica 2016!

*We – the team of RIGGTEK – thank you very much for your visit at our booth at Analytica and your interest at our new and existing products!*

*With your input and inspiration we will now go on in continuously working on optimal, innovative and practical solutions for you in the area of Dissolution and are available for you.*

The image displays four product highlights in a row, each with a title and a corresponding image:

- Sampilio X8 Data Administration ...project...**: Shows a white Sampilio X8 dissolution tester.
- Sampilio X8 Transfer-Modul for Media Replacement**: Shows a white Sampilio X8 dissolution tester with a transfer module.
- Sampilio X8 communication with Dissolution - Testers**: Shows a white Sampilio X8 dissolution tester with a network diagram below it.
- Dissolution-Tester easyDISS with cooling-option until 4°C**: Shows a white dissolution tester on a stand with a cooling option, accompanied by a snowflake icon.

Below the first image is a software interface for **Clarity™ 6.2** by DataApex. Below the second and third images is a diagram titled "Functional Principle of the Sampilio X8" showing a computer monitor and mouse connected to the device. Below the fourth image is a snowflake icon.
